

## Student Teacher Policy

In our center we receive students of university practices of infant and primary school teachers in Córdoba, as well as students of different masters in Montessori pedagogy who come to do observation or work hours in our center.

As a rule, we do not receive more than 1 student per classroom in our center, and each of them has assigned one of our teacher as a tutor.

The students in practices must respect the norms of our center and especially the ethical code, in which the following specific norms for them are collected:

### **Specific ethical code of action for our personnel in practices or observations:**

1. Our students in practices or observation will never remain alone with any student in the classroom.
2. Our personnel in practices or observation will not change of clothes or diaper in its case to any student.
3. Our personnel in practices will not remain without company in the center.
4. Never act outside of our code of ethics.
5. The student in practices or observation will always have a tutor assigned who will be responsible for their training and actions.
6. Our personnel in practices or observation will facilitate the center, in the moment prior to its incorporation, the certificate of criminal offenses.
7. Our interns will never stay longer than strictly necessary in our center.
8. In case of medical emergency, the trainee will take the task of notifying the health emergency services, while our staff, being trained in pediatric first aid, will monitor the student's health.
9. In case of other kind of emergency (like fire, flood, natural catastrophe...), the trainee will take the task of notifying the health emergency services, while our staff, being trained in pediatric first aid and in risk preventions, will monitor the student's security.
10. Like any co-worker, our interns will be treated like any worker except for the aforementioned responsibilities.
